

BUSINESS PROPOSAL

Yaqeen Patelia ST10507027 Group 1

Introduction

This proposal includes the development of a professional website for the fictional independent cafe business Brew Haven Coffee Shop. The purpose of the website is to improve the organization's online presence, provide customers with accessible business information, and promote products and services through a responsive and user-friendly platform. This proposal outlines the website goals, design considerations, technical requirements, budget and project timeline necessary for successful implementation (OpenAI, 2026).

1. Organization Overview

Organization Name

Brew Haven Coffee shop

Organization Background

Brew Haven Coffee Shop is a fictional independent coffee shop located in a busy city area and catering to students, office workers and residents. The café is committed to offering quality coffee, fresh pastries and a friendly atmosphere for its customers. As digital marketing and online engagement continue to grow, businesses require professional websites to remain competitive and accessible to customers (Krug, 2014). The business relies mainly on word-of-mouth marketing and social media posts from customers. A professional website would boost the organization's digital presence and improve communication with customers.

Vision Statement

To provide customers with high-quality coffee, excellent service, and a comfortable environment that encourages relaxation and social interaction.

Target Audience

Target Audience:

- Students and young adults
- Office workers and professionals
- Local residents
- Coffee enthusiasts
- Tourists and visitors searching for cafes online

2. Website goals and objectives

The primary goal of the website is to establish a strong online presence for Brew Haven Coffee Shop and improve customer engagement. A professional website can improve customer communication, increase brand awareness, and support business growth through online interaction (Mozilla Developer Network, 2026).

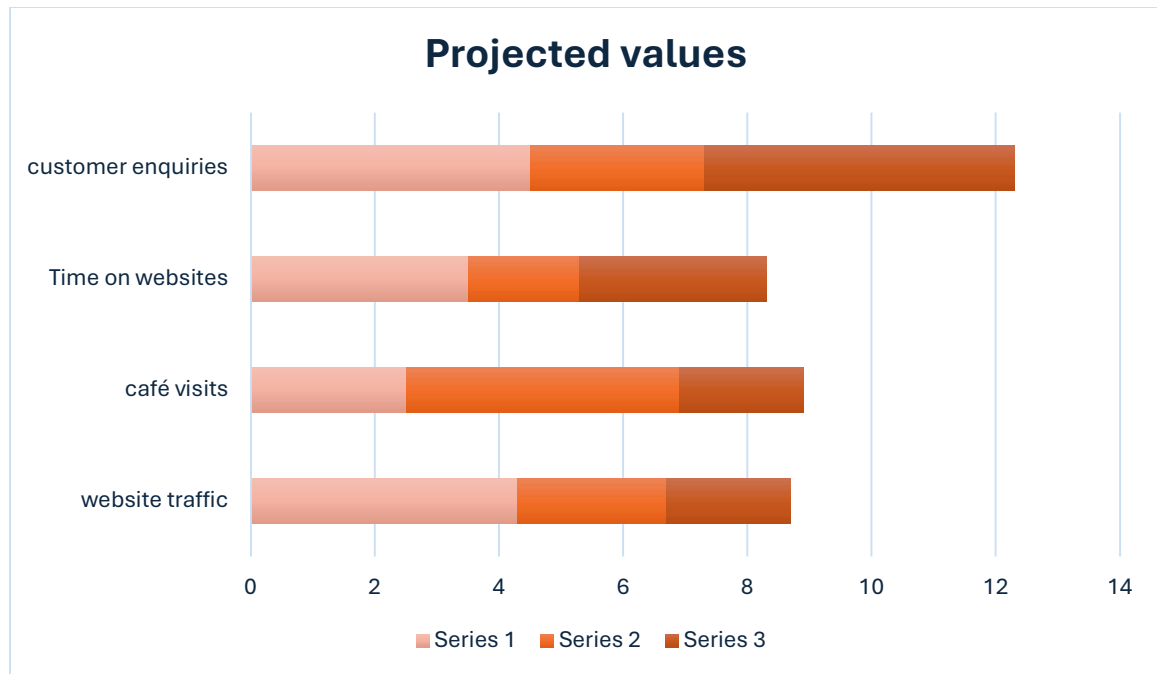

Website Objectives

- Promote the coffee shop and its products
- Provide customers with the menu and business information
- Increase customer awareness and traffic around the coffee shop
- Improve communication between the business and customers
- Showcase the coffee shop environment and atmosphere

Key Performance Indicators (KPIs)

The success of the website can be measured by the following:

- Increase in website traffic
- Number of customer enquiries through the contact page
- Increased social media engagement
- Growth in customer visits to the café
- Increased time spent on the website and improved user interaction

3.Current Website Analysis

Brew Haven Coffee Shop currently does not have a dedicated professional website. Customers currently obtain business information through printed flyers, local advertisements, and direct visits to the café, which can make it difficult to access up-to-date information quickly and conveniently.

Weaknesses

- Limited online visibility
- No main source of information
- Customers can't easily access menu details
- Lack of professional online branding

Areas for improvement

- Make a responsive and modern website
- Improve accessibility and navigation
- Provide detailed menu and contact information
- Strengthening brand identity and customer trust

4.Proposed Website Features and Functionality

The proposed website will consist of five main pages designed to provide users with clear and organized information.

(openAi.2026)

Home Page

1. The introduction to Brew Haven Coffee Shop
2. Navigational bar for the website

Menu Page

1. Coffee and beverage selection
2. Pastries and sweet treats
3. Product pricing and categories

Gallery Page

1. Images of products and café environment
2. Photos taken by some of our customers

About Us Page

1. Business history and background
2. Mission statement
3. Our staff

Contact page

1. Contact form
2. All contact details
3. Location and operating hours

Additional Website Functionality

1. Responsive navigation menu
2. Mobile-friendly layout

3. Social media integration
4. Interactive contact form
5. Consistent branding on all pages

5.Design and User Experience

The website will follow a modern and welcoming design aesthetic that reflects the atmosphere of a coffee shop.

Colour Scheme

The colour palette will include:

- Warm brown tones
 - Cream and beige backgrounds
 - White accents
- (OpenAi.2026)

Typography

The website will use clean and professional fonts such as Aptos and Arial to improve readability and visual consistency. Headings will be larger and bold to establish hierarchy and improve user navigation.

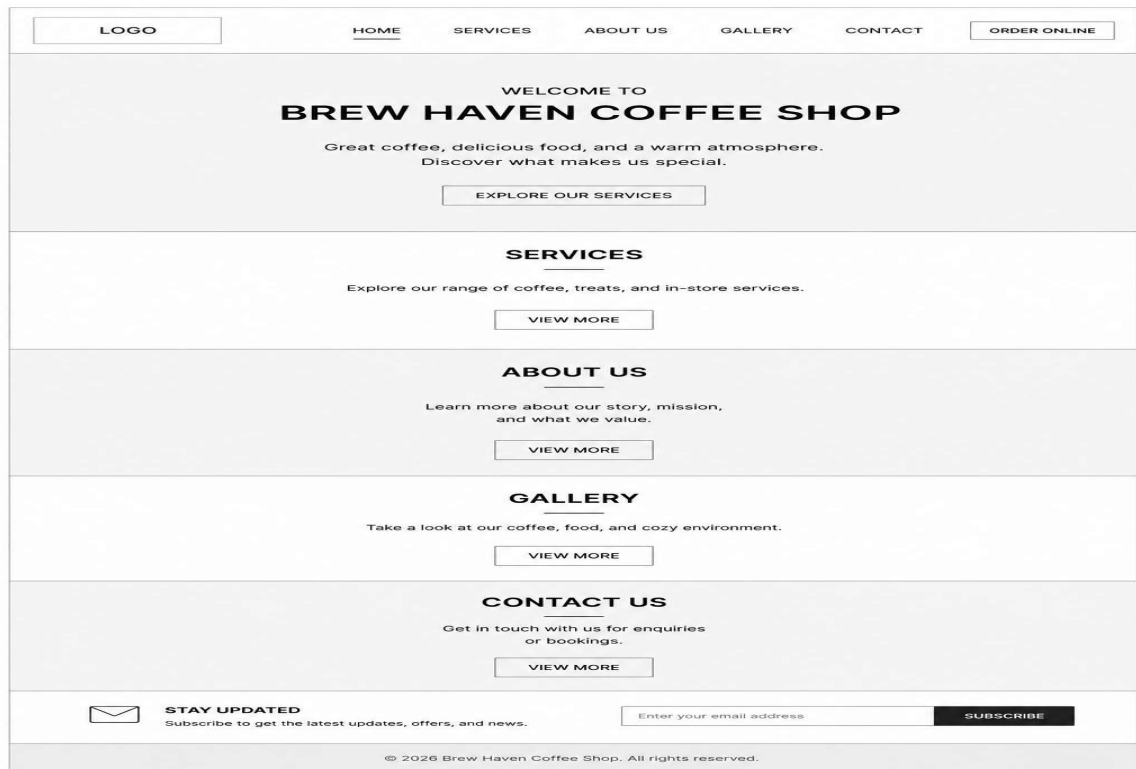

Layout and Design

The website layout will be simple, responsive, and visually balanced. Content will be organized clearly to ensure users can easily locate information. Images will be used effectively to improve presentation and readability.

User Experience Considerations

- Easy navigation between pages
- Accessible layout and readable text
- Fast loading times
- Clear and easy-to-find buttons that guide users to important actions.

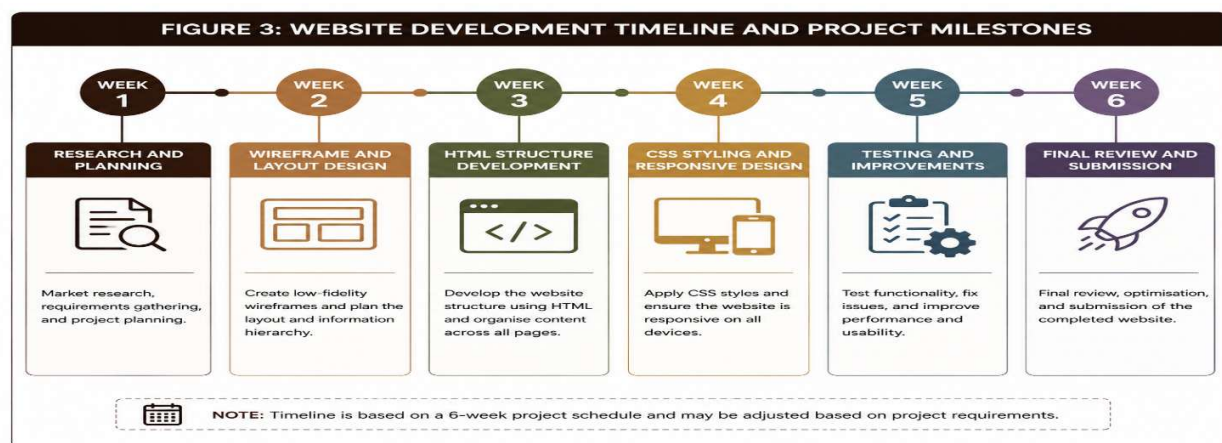

- Mobile responsiveness
- Wireframes

6. Technical Requirements

The design of the Brew Haven Coffee Shop website will be done using HTML5, CSS3, and JavaScript, ensuring that the website is responsive and easy to navigate. The domain name suggested is www.brewhaven.co.za, and hosting will be done using hosting companies such as Afrihost and HostAfrica. Images and text will be optimized to enhance performance, while maintaining and hosting the website securely will increase reliability and security (Mozilla Developer Network, 2026).

7. Timeline and Milestones

(OpenAi.2026)

8. Budget

(openAi.2026)

Item	Estimated cost
Domain creation	R200 yearly
Web hosting	R1200 yearly
Website Development	R600
Maintenance/Updates	R1500 yearly
Graphics and Media	R1000

Total estimation	R9900 +-
-------------------------	-----------------

The proposed budget reflects realistic costs associated with small business website development and maintenance in South Africa.

9.Content and Research
